Use Pogamut 3 under Eclipse

This document contains illustrated step-by-step tutorial how to start-up Pogamut 3 bots under Unreal Tournament 2004 from Eclipse IDE. We thank Liew Clement for creating the tutorial!

Created by Liew Clement, clementliew@nus.edu.sg, National University of Singapore

Alternatively, you may contact Jakub Gemrot, <u>mailto:jakub.gemrot@gmail.com</u>, Charles University in Prague, Czech Republic

Pogamut webpage: http://pogamut.cuni.cz

Step-by-Step Tutorial

- 1. Install Eclipse 3.6, or 3.7 or newer (v3.7.2 is advised as it is stable and comes with M2E plugin preinstalled)
 - o Download Eclipse IDE for Java Development
 - Unpack it to some place, e.g. c:\eclipse
 - Turn off UAC (some plugins are having problems with UAC during installation)
- 2. Install Subclipse plugin
 - See Subclipse Download&Install web page
 - Copy to clipboard correct update site
 - e.g.: <u>http://subclipse.tigris.org/update_1.8.x</u>

Current Release

Eclipse 3.2/Callisto, 3.3/Europa, 3.4/Ganymede, 3.5/Galileo, 3.6/Helios, 3.7/Indigo, 3.8/4.2/Juno

Subclipse 1.8.18 and 1.6.18 and 1.4.8 are now available for Eclipse 3.2+!

See the changelog for details. Existing Subclipse users should read the upgrade instructions for important information on changes you to need to make to your Eclipse preferences to see the new version in the update manager.

2

Subclipse 1.4.x includes and requires Subversion 1.5.x client features and working copy format.

Subclipse 1.6.x includes and requires Subversion 1.6.x client features and working copy format. Subclipse 1.8.x includes and requires Subversion 1.7.x client features and working copy format.

Links for 1.4.x Release:

Changelog: http://subclipse.tigris.org/subclipse_1.4.x/changes.html Eclipse update site URL: http://subclipse.tigris.org/update_1.4.x

Zipped downloads: http://subclipse.tigris.org/servlets/ProjectDocumentList?folderID=2240

• Startup Eclipse, go to Menu - Help - Install New Software

- Click on "Add" button on the right-upper side of the dialog
- Add new update site (name it Subclipse and provide link from the clipboard from the Subclipse site)

0	Install	- • ×
File Edit Navigate Search Project Run Window Help	Available Software Select a site or enter the location of a site.

- 3. Install M2Eclipse plugin (this step is not required as of Eclipse 3.7.2 version that has M2E bundled, applies if you're using IDE for Java Developers version of Eclipse)
 - o similar operation to installing Subclipse but different update site
 - o see <u>m2eclipse</u> web page, particulary <u>m2eclipse Download</u> section

- pick their update site, e.g.: <u>http://download.eclipse.org/technology/m2e/releases</u>
- install plugins from their update site
- 4. Now it is advised to use <u>Tortoise SVN</u> (or some other SVN client) to checkout desired Pogamut project from the SVN
 - Use <u>svn://artemis.ms.mff.cuni.cz/pogamut/project</u> for all projects

- 5. In Eclipse, right-click empty space in Package explorer window (usually located on the left upper side of Eclipse), click Import, choose Existing Maven Project and browse for folder where you have checked out the Pogamut SVN
 - Eclipse should load all Maven projects into the list and you may select which one you want to import
- 6. Alternatively, you may specify new remote catalog of archetypes via Eclipse-Window-Preferences-Maven-Archetypes
 - Click Add Remote Catalog
 - Fill in catalog URL: <u>http://diana.ms.mff.cuni.cz:8081/artifactory/libs-release-local/archetype-catalog.xml</u>
 - Name it as: Pogamut Archetypes

• Click OK

- After that you may create new Maven project based on archetype from the catalog, note that we're regularly updating the catalog with each release of the Pogamut platform
 - ۲ <u>File Edit Source Refactor Navigate Search Project Run Window Help</u> New Alt+Shift+N ► 🖄 Java Project Project...
